

DD/A/ODP WEEKLY REPORT
Week of 19-26 August 1977

I. Major Activities During the Past Week:

A. Support to OTR

STATINTL

PREVMAIN - A system for preventive maintenance for the Office of Training. The modifications which the customer requested to be made to the OL/HEB maintenance system appear to be simple to add. The most pressing problem is to determine if the appropriate communications support for the system exists between Headquarters and [REDACTED] Engineering Division is providing support on this problem. Engineering Division will inform us when a printer will be available for use at [REDACTED]

STATINTL

B. Support to OGCR

CARTDEV - The line smoothing program which was obtained from the Engineering Topographic Laboratory has been modified and delivered to the customer. The program will support the digitization of the 200 mile fishing limit for the Law of the Sea Project. This effort involved about 180 person hours and 550 lines of code. [REDACTED]

STATINTL

C. Support to OP

PERSIGN - Integrated Personnel Information System. The requirements review for the CENQUAL (Central Qualifications) sub project of PERSIGN was held and was very successful. A follow-up review is necessary due to the volume of information covered and due to some changes made in the requirements. [REDACTED]

STATINTL

D. Support to OCR

STATINTL

OCRDIR - Automation of the OCR directories. We have provided support to OCR/FEPAC personnel in the preparation of a preliminary (XEROX 1200) listing of Chinese directory data. This listing was produced in response to a request from a National Security Council customer. A copy of this listing was also forwarded to Secretary of State Vance prior to his visit to China. [REDACTED]

E. Training During the Past Week:

1. A three-day course, Basic VM, was completed by 20 students.
2. A two-day course, Batchmon, was completed by 14 students. [REDACTED]

STATINTL

Nothing to report on FOIA.
